SUMMARY

Full-Stack Developer with **3 years of experience building production web applications and SaaS platforms** across healthcare and travel domains. Strong expertise in **React and MERN stack development**, with hands-on experience building scalable frontend applications, backend APIs, and database systems using **Node.js, Express, MongoDB, and MySQL**.

Experienced working across the full product stack including **React, Next.js, Angular, Python APIs, cloud deployment, CI/CD pipelines, and modern AI-assisted development tools**. Comfortable delivering features independently in fast-paced startup environments.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Angular, HTML5, CSS3, TailwindCSS

Backend: Node.js, Express.js, NestJS (familiar), Python (FastAPI / Flask), REST API Development, GraphQL

Databases: MongoDB, MySQL, PostgreSQL, Redis

Cloud & DevOps: AWS (EC2, S3, CloudFront), Docker, GitHub Actions, CI/CD Pipelines

Styling: Tailwind CSS, Material UI, Styled Components, Responsive Design

Libraries & Tools: Redux Toolkit, React Query / TanStack Query, Context API, Custom Hooks

Testing: Jest, React Testing Library, API Testing

AI & Developer Productivity Tools: OpenAI API, Gemini API (basic integration), AI-assisted development, Prompt Engineering (basic), Cursor IDE, GitHub Copilot

PROFESSIONAL EXPERIENCE

Full-Stack Developer / HOI (Travel Tech) | July 2024 – Oct 2025

- Worked on a production **travel booking platform** supporting search, booking, and payment workflows.
- Built responsive web applications using **React and Next.js** for search, booking, and checkout modules.
- Developed and integrated **REST APIs using Node.js and Express** supporting authentication, booking operations, and third-party travel integrations.
- Implemented **code splitting, lazy loading, and performance optimizations**, improving page load performance and frontend efficiency.
- Built reusable React components and shared UI modules used across booking and dashboard features.
- Implemented **JWT-based authentication and role-based access control** for secure user management.
- Optimized backend queries and API caching strategies improving response time by **~30%**.
- Integrated **third-party travel and payment APIs** supporting reservation and checkout workflows.
- Deployed and maintained applications using **AWS infrastructure with CI/CD pipelines via GitHub Actions**.

Full-Stack Developer / Clinic Yantra (Healthcare) | June 2023 – April 2024

- Developed healthcare management systems used by clinics for managing patient records and appointments.
- Built **interactive dashboards using Angular and React** for patient management and clinic administration.
- Integrated **REST and GraphQL APIs** for appointment scheduling and patient data workflows.
- Developed backend services using **Node.js and Python (Flask / FastAPI)** supporting scheduling and notification systems.
- Improved frontend performance reducing **page load time by ~40%** through optimized rendering and API usage.
- Implemented **JWT-based authentication system** for secure healthcare user access.
- Developed reusable UI components improving maintainability across multiple modules.
- Added unit and integration tests using **Jest and React Testing Library**.

Frontend Developer / Giottus Technologies (Fintech) | June 2022 – March 2023

- Converted 15 Figma designs into responsive React components using CSS modules
- Built 5 reusable button variants used across the application.
- Fixed **8 cross-browser issues** where styles looked different in Firefox vs Chrome.

- Integrated 5 REST APIs for cryptocurrency prices with **loading skeletons**
- Added **dark mode toggle** using Context API with theme saved in localStorage.
- Implemented basic form validation for KYC with file size & type checks.
- Added **lazy loading** for images below the fold on the landing page.
- Participated in daily stand-ups & completed tasks within 2-week sprints.

PERSONAL PROJECTS

AI SaaS Platform – Full Stack (PERN) [Live](#) / [Code](#)

Tech Stack: React, Node, Express, PostgreSQL (Neon), Stripe, Clerk, Tailwind, Vercel

- Built a full-stack AI SaaS platform with React, Node, Express, PostgreSQL, Stripe, Clerk, Tailwind, and Vercel.
- Developed responsive frontend with dynamic forms and dashboards.
- Created secure APIs for tool usage, user activity, and subscription logic.
- Implemented authentication with Clerk and social login support.
- Integrated Stripe for subscriptions, checkout, and feature gating.
- Deployed full-stack app on Vercel with CI/CD.

E-commerce Platform – Full Stack (MERN) [Live](#) • [Code](#)

Tech Stack: React, Node, Express, MongoDB, Stripe, Clerk, Redux Toolkit, Tailwind, Vercel

- Built product listing, cart, checkout, and order management flows.
- Designed responsive UI with filters, cart UI, and admin dashboard.
- Developed REST APIs for products, orders, and payments.
- Implemented authentication and role-based access for admin and users.
- Integrated Stripe for secure checkout and order status tracking.
- Deployed application on Vercel with live payment support.

EDUCATION

B.Tech – Computer Science & Engineering

RGPV, Bhopal — 2021

COURSES & TRAINING

Namaste React – Akshay Saini

Namaste Node.js – Akshay Saini

Data Structures & Algorithms (DSA) Certification
